Important things to know:

- On your international flight, pack things as if the airline might lose your bags. Keep things you will need right away in your carry-on. It seldom happens, and almost always the bags arrive a couple of days later, but this way, if bags don't arrive with you, you will be able to continue on your safari while the airline finds them.

What to do when your luggage gets lost at the Airport:

- We naturally hope you don't lose your bags, but it does happen. If your bags do not show up, do the following:
- Report the problem to your air carrier inside the airport at the Baggage Claim - before passing the CUSTOMS - and fill out the required papers
- Request a compensation for your inconvenience (often \$ 50.- for emergency purchases and a bag with simple toiletries and a t-shirt)
- Ask them when they expect the bag will arrive and tell them where you will be based on your itinerary.
- Leave the keys and / or combination with the airline so that they can clear the bags through customs
- Ask the airline to go with you to advise the Customs Officer that bags were lost, so there will be no problems further in getting your bags cleared when they arrive.
Tell your safari driver and ask his office work with the airline to get your bags to you at the earliest convenience.
